

Motus Power is proud to be working directly with Rexel Energy Solutions on our solution offerings including disruptive smart motor solutions, drives, and UVC HVAC Solutions offerings as we continue to expand. Motus Power and Rexel Energy Solutions are two companies with similar missions and goals therefore a natural fit for collaboration. Motus Power focuses on sustainability, and energy efficient solutions that help increase energy savings, and reduce carbon footprint through national turnkey implementations and project management throughout the entire process. Rexel Energy Solutions (RES) focuses on sustainability and energy retrofits servicing the Energy Services market. Leading with technical expertise, RES and Motus Power both look to lead the markets in energy efficient solutions. We are proud to be working with them and looking forward to the future.
