## **Motus Power and Power/mation Announce Transformative Partnership to Advance ESG, Energy Efficiency, and SBTi Goals**

October 19, 2023 — Two industry leaders, Motus Power and Power/mation, have joined forces to pave the way for businesses to achieve their sustainability and energy efficiency objectives. This exciting partnership brings together the expertise and capabilities of both companies to drive innovation and support clients in reaching their Environmental, Social, and Governance (ESG) targets, energy efficiency goals, and Science-Based Targets initiative (SBTi) commitments.

Motus Power, specializes in sustainable, energy-saving solutions designed to reduce carbon footprints and associated costs while enhancing building efficiency and resilience. By optimizing energy usage and utility reductions, Motus Power enables companies to improve profitability while supporting sustainability initiatives.

Motus Power's comprehensive approach involves identifying areas of sub-optimal energy efficiency, proposing effective changes, processes, and technology upgrades, and implementing these solutions. This strategy ensures that clients experience an immediate return on investment (ROI) while contributing to a more sustainable future.

Power/mation, on the other hand, a high-tech industrial automation distributor headquartered in Saint Paul, Minnesota, with a strong presence across the Midwest, boasts a line card featuring over 100 suppliers, including renowned names such as ABB, Baldor, Nidec, and Turck. With in-house engineering expertise spanning power transmission, process automation, and industrial internet of things (IIoT) solutions, Power/mation is well-positioned to provide innovative automation solutions with exceptional customer service.

The Power/mation Solutions Group, an extension of Power/mation's commitment to innovation, comprises a dedicated team of engineers and assembly technicians. This specialized team offers tailored kits and assemblies, enclosure modifications, and safety fencing designs for a wide range of applications. Their goal is to accelerate businesses by delivering customized, high-quality automation solutions.

The partnership between Motus Power and Power/mation signifies a significant step forward in the quest for environmental responsibility and enhanced energy efficiency in the industrial sector. By combining Motus Power's sustainable energy solutions with Power/mation's automation expertise, businesses will have access to a comprehensive suite of services that not only reduce environmental impact but also boost operational efficiency.

About Motus Power:

Motus Power specializes in sustainable, energy-saving solutions aimed at reducing carbon footprints and associated costs, improving building efficiency, and enhancing resilience. Their approach includes identifying areas of sub-optimal energy efficiency, proposing effective changes, processes, and technology upgrades, and implementing these solutions to provide an immediate return on investment (ROI).
